

Name: Aroon Kumar

Goal: My goal is to become a highly qualified and regarded software engineer for a renowned tech firm, get financial freedom and settle abroad.

Steps:

1. Education (1 - 4 Years)
 - Complete a bachelor's degree in Computer Science
 - Work on projects and get internships to gain real-world experience.
2. Technical skills development and get practical experience (1-2 Years):
 - Develop strong programming skills in relevant languages and frameworks.
 - Get industry experience and work on real-world projects.
3. Master Degree Planning (0.5 Years):
 - Find reputable international colleges that offer relevant master's degrees in software engineering or related fields.
4. Application Process (0.5 Years):
 - Complete the application process for master's programmes abroad and get ready for required exams (e.g. IELTS).
5. Specialization in a particular area (1-2 Years)
 - Pursue a master's degree in a specialized area from abroad.
6. Cultural Adaptation:
 - Adopt cultural diversity and adaptability from a multicultural perspective.
 - Look for chances to interact with the neighbourhood and develop an understanding of culture.
7. Job Hunting and Career Growth:
 - Make use of network and online resources to actively look for jobs at reliable tech companies and look for opportunities within the company to get promotions.
8. Settling Abroad:
 - Understand the requirements for eligibility, and application procedure, and complete all requirements for getting permanent residency.
9. Get Financial Freedom:
 - Adopt disciplined spending, savings plan, and set financial goals and make appropriate investments.
